Profession Summary

B.Tech CSE graduate and aspiring full-stack developer with strong foundations in DSA and software development skills. Quick learner with strong analytical skills, seeking a fresher SDE role.

Technical Skills

Languages: Java, JavaScript, C++, Python, HTML/CSS
Frameworks/Technologies: Node.js, React, NextJS, Django
Databases/Cloud: MongoDB, MySQL
Profiles: Leetcode, LinkedIn, HackerRank, GitHub

Education

Chandigarh Group Of Colleges

Aug. 2022 – July 2026

Bachelor of Technology in Computer Science, Landran

CGPA: 7.5/10.0

DAV Senior Secondary School (CBSE)

Apr. 2021 – May 2022

Senior Secondary Education, Chandigarh

Percentage: 59%

Experience

Unified Mentor

January 2026 – Present

Software Intern

Remote

- Developed full-stack web applications using the **MERN stack**, implementing **secure authentication**, CRUD operations, and **reusable UI** components.
- Built practical projects including a password generator tool and mini web applications to strengthen **real-world** software development skills.
- Collaborated using **GitHub** for version control, feature updates, and **bug fixes**, improving **code quality** and workflow efficiency.

Think Next Technologies

May 2024 – July 2024

Software Trainee

Remote

- Completed 2-month industrial training in **MERN stack** (MongoDB, Express.js, React.js, Node.js).
- Built a full-stack web project — Star Public School Website — implementing real-world **CRUD features** and **responsive UI**.
- Learned about **Software Development Life Cycle** and **Testing principles**.

Projects

Online Banking System | React.js, Node.js, Express.js, MySQL

- Built a full-stack project management system using **React** and **Node.js** supporting task creation, assignment, progress tracking, and **role-based access control**.
- Designed a scalable MySQL-backed backend with secure data handling and RESTful APIs for seamless frontend integration and deployment.
- Implemented the OOPS principle while developing the project structure.

Personalized Learning Path Recommender | Python, Scikit-Learn, Deep Learning, Streamlit

- Developed a Python ML-powered **recommendation system** for **personalized learning** paths based on user skills and progress.
- Designed interactive quizzes** to identify knowledge gaps and continuously improve recommendation accuracy.

Achievements

- Multiple Badges on Leetcode (Jan. 2026):** Solved 250+ DSA problems across major coding platforms, strengthening problem solving skills.
- Carrer Sprint 2k24 (Sep 2024):** Placed in the top 20 among 400+ participants in aptitude and skills evaluation.

Certificates

- AWS Academy Graduate:** Completed the cloud foundation course.
- MySQL by Simplilearn:** Completed certification in MySQL from basic to advanced.
